PROJECTS

Portfolio Website

- personal portfolio website design step by step using HTML CSS and JavaScript

- In this website design we will add name, designation of the user. Then we will display the image, skills, work experience and education details. We will also add the list of services and work portfolio on this website. In the footer of this website we will add contact info and contact form. Your can receive the contact form data on your google sheets.

Mini Project as Traveling Booking Website

- We build a small static Travling website that shows the information about a specific web traveling website.we use HTML CSS and Javascrits for frontend and PHP for backend.

Employee Mangement APP

- To develop a full stack web Application that is using by crud features for frontend react and springboot

Cricket score card and information

- In this project it show live score and match history and point table
- Technology frontend angular routing standalone components API calling and for Backend Spring boot, JPA ,Services, Scappping

HOBBIES
